Designed for aspiring horticulturists and for professionals currently working in the landscape industry, the Horticulture Certificate provides the science-based curriculum sought by current industry employers. The certificate is a comprehensive approach to horticulture, teaching you the tools of proper plant care, how to think strategically and holistically in the environment, and how to be successful and competitive within the industry.

The certificate program is designed to be completed in 1 year.

- ***Students can begin the program any quarter***
- ***4 elective units or one 4 unit program approved internship to be completed before certificate is awarded.***
