Estimated Total Costs	\$2,800

The Gardening specialization is designed for beginning gardeners; individuals looking for fundamental gardening and plant care knowledge. The Specialization provides an introduction into the world of horticulture, focusing on irrigation, soils and hands-on growing and maintenance. This short program provides students with the foundation on which to properly grow and maintain plants.

The specialization is designed to be completed in 1 year.

Students can begin the program any quarter

Courses are offered both remotely and in-person
